Julie Newman : Greenhouse and Nursery Management Practices to Protect Water Quality before purchasing it in order to gage whether or not it would be worth my time, and all praised Greenhouse and Nursery Management Practices to Protect Water Quality:

This handy guide is a must have for the green industry. Specifically developed for managers interested in preventing contamination of runoff and groundwater leaching, these suggested management practices will help guide you through your own successful plan of action. Also included is an environmental audit checklist to guide you through management practices that impact the environment, increase your awareness of practices that lessen runoff and leaching, and help you identify areas that may require improvements. Chapters cover: protecting water quality, management goals and practices to mitigate runoff and leaching, irrigation practices, nutrients, pest managements,

pesticide use and water quality protection, erosion and runoff, water recycling, and environmental audit.
