0 of 0 people found the following review helpful. Good book for newbiesBy vicky wilsonGardening is one of the interesting thing to do it not only help you but it will help your family and eventually the environment.To start with

Gardening one need to know some basics like how to start with , what fertilizer need to be used, which plant can be cultivated. Through this chapter the author clarified all the basics through the chapters :1)basic of greenhouse2)types of greenhouse3)choosing material for gardening4)greenhouse construction5)important tips6)basic greenhouse cultivation7)avoiding common mistake.I would suggest this book to any newbie in gardening0 of 0 people found the following review helpful. so i am very happy and exciting after looking at this bookBy kingcristyInformative book,I am a kind of person who wants planting,even in my backyard only.I encountered ups and down on it,maybe i am lack or insufficient knowledge about planting,so i am very happy and exciting after looking at this book.I know this book will surely help me on how,what,avoidable things and increase my skills and ability in planting.With planting green plants,i know as a citizen i can contribute even in a small way for the good of our environment.0 of 0 people found the following review helpful. Covered the basics, good readBy Lucky MeI am new to greenhouse gardening and I am happy I got myself a good reference as a beginner. It has pretty much addressed the basic questions I had. Learned about choosing the materials, setting it up and growing your garden. While this may not be as comprehensive, it sure is a good starting point for the subject matter and I found decent information. I am happy and satisfied, overall.

The Beginners Choice for Greenhouse Construction Greenhouses provide a chance for growers to grow crops that will not fail them, even when the climatic conditions change. Different crops require a different kind of climate in order for them to grow well to the harvesting time, which are all provided inside a greenhouse. Greenhouses today are becoming quite useful because of the increasing cost of food. If you have your own greenhouse, you will not have to worry about spending so much money on foods that you can comfortably grow in your own garden. The key to getting the most out of your greenhouse is making certain that you have a perfect greenhouse of the right size and structure and one that will serve your needs for a very long time.
