Sam Huddleston, Michael Hussey : Grow Native: Landscaping with Native and Apt Plants of the Rocky Mountains before purchasing it in order to gauge whether or not it would be worth my time, and all praised Grow Native: Landscaping with Native and Apt Plants of the Rocky Mountains:

2 of 2 people found the following review helpful. Black and White By J. A. Eastman We bought an old house with an old yard that needs a revitalization program, hence the purchase of this book. Well, the good and the bad of this book is that it is in black and white. It has illustrations that I love. The illustrations are of a man next to the plant in question, which gives you a lot of perspective on what that plant is going to be at maturity. It's great, I love that. It has black and white photos of the plants. I hate that. A black and white photo of a plant just doesn't help much. You have to look the plant up in another book with color photos to see what it actually looks like. The book has good information on the varieties of plants, how much to water, where to plant, etc. It is just too bad this one book could not be THE book instead of coming up short. 0 of 0 people found the following review helpful. Five Stars By alene Great book--checked it out of the Library 4 times---decided I better buy it! 0 of 0 people found the following review helpful. Great condition, as described. By Customer Great condition, as described.

Here is a frank discussion of the hardiest of trees, shrubs, and groundcovers suitable for landscaping in the rough, and

at times unforgiving, Rocky Mountain climate.

"A very handy landscape tool with good facts and common sense based on years of personal experience." About the Author Sam Huddleston is a noted professional planner and landscape architect. He is a Fellow of the American Society of Landscape Architects and a Member of the American Institute of Planners. He headquarters in Denver but practices throughout the West, even as far afield as Alaska. Michael Hussey grew up in Iowa, but many of his childhood summers were spent in Colorado with his geologist father. He developed a love for the area and, after a stint with Army in Augsburg, Germany, headed to Colorado and began his career as a landscape architect with the Huddleston firm.
