KD Knowledge is power we can never read to much or have the information on hand to look up for a refresher then a good book.

Scientific name of Kale is *Brassica oleracea* var. *acephala*. Kale is an exotic temperate Cole crop which is mainly grown for its edible leaves. Scientific Name of Brussels Sprouts is *Brassica oleracea* var. *Gemmifera*. It is a tall-stemmed cole crop where axillary buds forming in the axis of each leaf are used as vegetables. Scientific Name of Celery is *Apium graveolens*. Celery is a popular leafy vegetable in many parts of the world and its edible portion is the long, thick, green fleshy petioles and associated leaves. Even though celery is a biennial plant belonging to the Umbelliferae (*Apiaceae*) family it is commercially grown as an annual crop.
