Rosemary Alexander : Handbook for Garden Designers before purchasing it in order to gauge whether or not it would be worth my time, and all praised Handbook for Garden Designers:

1 of 1 people found the following review helpful. From wonder to display: manageable steps to garden design By Anne This slim little book did everything it said it would. I needed help with determining the slope of my property and I needed to brush up on my geometry for curves and pinpointing existing trees. I love landscaping, but am not a professional, and I love to garden. Though I hoped the book would help me improve my meager skills, I was happy to discover that it provided me with much more than a tool box to refresh my landscaping interests. It's written clearly, has sketches that convey ideas well and lays out in manageable steps how to go about tackling one's garden or starting a design consulting business. Like a bud opening to full bloom, this book will meet the reader's interests and provide encouragement and clear direction on the possibility of achieving more than one may have originally thought possible. 0 of 0 people found the following review helpful. Great Seller! By LJ Interesting book. Great Seller !!! 0 of 0 people found the following review helpful. Five Stars By Teresa Schroder Fabulous book in top condition

All gardeners will welcome this brand new edition of a practical, popular, and hard-working guide to the art and science of garden design. Updated with magnificent new photography, information on making the most of digital images at presentations, and a wealth of new ideas, it leads keen amateurs and budding professionals through the complete process of making a garden from scratch. From carrying out the initial survey to drawing up plans, from presenting to client to implementing the final design, everything is here. See how much can be done with simple, inexpensive equipment; use computer graphics to design garden structures; and take advantage of databanks with plant information to achieve exactly the desired effect each season of the year.

About the Author Rosemary Alexander FRSA is Principal of the English Gardening School at the Chelsea Physic

Garden in London, where she teaches design and graphics. She also lectures at the New York Botanic Garden. Trained as a landscape architect, she has worked on a wide range of gardens in Europe, the Middle East and the USA and has an international reputation as a garden designer.
