Whenever I visit them, I find myself pouring over it, studying the design details in every photo. I realized, finally, that I had to purchase the book for myself. I will never live in Hawaii, nor will I decorate a home with a Hawaiian sensibility, but I will use the design principles that are everywhere evident in the images and that can be applied to interior decor anywhere. What is especially engaging to me is the way the designers blended elements representing the diversity of cultures that make up Hawaii. 2 of 2 people found the following review helpful. By Sylverdollar This is a gorgeous coffee table book showcasing some of the most beautiful homes in Hawaii. We vacationed there this past October, and we plan on retiring to Maui. I am gathering information for when we make the move, we will be informed and ready.

Hawaii, A Sense of Place: Island Interior Design shows the development of home design in the islands as it incorporates the influences of a balmy climate, lush natural environment and richly diverse cultures. Its style is based on ease and informality, love of family and genuine warmth and that special brand of hospitality called aloha. Mary Philpotts McGrath has teamed with lifestyle writer, Kauai Philpotts, San Francisco-based photographer David Duncan Livingston, graphic designer Cindy Turner of Turner and de Vries, the Bernice P. Bishop Museum and Martin MacArthur Enterprises Ltd., to create a stunning 236 page book with over 300 full-color photographs. For collectors and aficionados the world over, Hawaii, A Sense of Place will entice the senses and feed the desire to live in an Island-inspired home. For those about to create their own environments, here is a source book to help with getting it right.
