Cortney Novogratz, Robert Novogratz : Home by Novogratz before purchasing it in order to gauge whether or not it would be worth my time, and all praised Home by Novogratz:

Unfortunately, it is just a review of the TV show episodes this book is based on. The show was inspiring but I wasn't aware that the book was just a catalogue of the show, not new material. Because of this I was disappointed. If you haven't seen the show, however, you will enjoy the book. 2 of 2 people found the following review helpful. Much more than I expected By T. Robbins I learned so much from this book, which is much more than just a coffee table book full of pretty pictures. The reader sees the budget for each room, how the money was spent, design plans and valuable suggestions for making pricey items like countertops and cabinetry more affordable. I appreciate the mix of vintage and new furniture pieces, as well as the placement of art that is selected to coordinate not only with each room, but to suit the personalities of the people using the room. I feel that Cortney pays very close attention to the needs and wishes of her clients and it shows. 1 of 1 people found the following review helpful. Exactly what I had hoped for... By Freebird Had seen the Novogratz's, loved their "look," and wanted to see examples of it that I could examine in detail. The book consists of a series of projects, each distinct, that are presented in before and after fashion. Paint colors, lighting fixtures, furniture: the details you want to know are discussed, and

their choices explained. There's just enough text, and lots of great photographs. And I like the fact that they don't insist on using expensive pieces only. In all, a very useful (and engaging) book.
