Marietta Loehrlein : Home Horticulture: Principles and Practices before purchasing it in order to gauge whether or not it would be worth my time, and all praised Home Horticulture: Principles and Practices:

1 of 1 people found the following review helpful. Needs a lot of work in the next edition By Earl! The book is incredibly disorganized. It will often reference a chart or table and instead of being on the same page, the chart could be 5 pages backwards or forwards in the book. The content is decent but the way it's put together is awful. 3 of 3 people found the following review helpful. It is ok By Dorothea L. This is the book used for my Horticulture class. The chapters could be divided better. Some have very little information and others are overwhelming. A real draw back is the arrangement of pictures in connection with the text that is describing them. They are often not on the same page. A little better planning could probably fix that. The definition or glossary section is very limited. 1 of 2 people found the following review helpful. Good book. By Josh Great resource! Works well for class that I'm taking, however there are plenty of less expensive options that I could recommend for those that are not required to buy this for a college course. If you can pick up a used copy on for around \$40, I would say go for it!

Home Horticulture: Principles and Practices was written for students, and teachers of horticulture. Practical Tips backed by a strong scientific foundation are found throughout the text. It includes hands-on activities and questions at the end of each chapter, as well as suggested readings to deepen one's knowledge, and to enhance teaching and learning.

Chapter 1: Horticulture and Plant Science Chapter 2: Reproduction in Plants Chapter 3: Seed Propagation Chapter 4: Vegetative Propagation Chapter 5: Soil Chapter 6: Plant Nutrition and Fertilization Chapter 7: Weather and Climate Chapter 8: Diseases Chapter 9: Insects and Other Plant Pests Chapter 10: Weeds Chapter 11: Pruning. Chapter 12: Indoor Plants Chapter 13: Vegetable and Herb Gardening Chapter 14: Berries, Fruits and Nuts Chapter 15: Turfgrass Chapter 16: Flower Gardening Chapter 17: Ornamental Trees, Shrubs and Groundcovers Chapter 18: Landscape Design, Installation and Maintenance

About the Author Marietta Loehrlein is a Professor of Horticulture at Western Illinois University. She received an Excellence in Teaching award from WIU in 2004-2005. Marietta developed a patented Regal Pelargonium named `Camelot that is marketed by Oglevee, and has contributed to the Journal for the American Society for Horticultural Science, HortScience, and HortTechnology.
