**Joan Kron : Home-Psych: The Social Psychology of Home and Decoration** before purchasing it in order to gage whether or not it would be worth my time, and all praised Home-Psych: The Social Psychology of Home and Decoration:

4 of 4 people found the following review helpful. Great book By Pamela M. Tucker Ever wonder why you try so hard to have . . . or not have . . . your parents' decorating style? Why you feel compelled to place a velvet Elvis in your Ethan Allen dining room? Why you use red as a neutral, or prefer square lamps over curved ones? I wasn't looking for answers to such weighty questions because it had not dawned on me that decor was more than eye candy. I stumbled on the book in the library thirty years ago and purchased an old copy recently. I felt that this intelligent book gave me an important insight into how I furnish my home and the messages I send in my public space and the messages I express in my intimate space. I thought it was a very good book that reaches beyond its era of publication. I found it a good companion book to John Molloy's Dress for Success and/or Live for Success. 2 of 2 people found the following review helpful. fraidy cat people By camellia loveri read this book when it first came out. loved it then and since decided i wanted my own copy. it tells a lot about people and why they decorate the way they do. also why they hire a decorator and are then afraid to touch things after said decorator got through. never did understand that mentality, but now i do. a lot of these fraidy cat people should just do what they want. it is after all their house, not the decorator's. 2 of 2 people found the following review helpful. Fascinating Social Aspects of Decorating By cdevries Though written in the 1980s, this book is still well worth reading if you're interested in the psychology and sociology of interior design.

The social psychology of home and decorations.
