Donato Nappo, Stefania Vairelli : Homes on the Move before purchasing it in order to gage whether or not it would be worth my time, and all praised Homes on the Move:

From tents to legendary, eternally popular accommodations on wheels such as caravans and campers; from trailer homes to state-of-the-art mobile structures for events or emergency situations; to the use of containers as readymades for contemporary prefab architecture: cheap, easy to build and environmentally conscious. You will find all this and more in this fascinating, original book, with beautiful colour images and detailed information. This book is a must-have for all those who succumb to the appeal of mobile accommodation, but also for those who design and construct homes on wheels, as an essential source of reference.

About the Author Donato Nappo, born in 1970, graduated from Milan Politecnico with a degree in architecture, then specializing in industrial design at Florence University. He has been working as a professional designer in the car industry for years.
