**Christine Pittel : House Beautiful Pools** before purchasing it in order to gage whether or not it would be worth my time, and all praised House Beautiful Pools:

5 of 5 people found the following review helpful. House Beautiful, Yes -- Practical, No By Randy Given This remains faithful to the House Beautiful theme -- wealthy "picture perfect" pools, but not very practical. Only about three of the pools would be useful for 90% of the inground pools that might be built. Not even very many good ideas that are not already known by most anyone who has seen pools in magazines. Most would take a full-time pool employee to maintain. Still, very good pictures in large format, so it deserves some credit.

Among the worlds most spectacular indoor and outdoor interpretations, the residential lap pools, ponds, whirlpools, and spas magnificently displayed here are the creations of international architects, designers, and landscapers such as William Turnbull, Jr., Hugh Newell Jacobsen, Jacques Wirtz, and Steven Ehrlich. Plunge into pools that dreams are made of through expert advice and lush illustration.

About the AuthorHouse Beautiful has a monthly circulation of nearly one million readers and stands out as the magazine choice for an affluent, educated audience seeking style, beauty, and taste.
